

User Manual

Website Name: Private Sale Site

1. Introduction

1.1 Purpose of the User Manual:

The purpose of this user manual is to provide comprehensive instructions and guidelines for users of the Private Sale Site. This document will assist both customers and professionals (brand representatives) in navigating the website, utilizing its features, and understanding the functionalities available to them. It aims to ensure that users can effectively manage their accounts, participate in sales, and access all the necessary tools and information provided by the website.

1.2 Target Audience:

This user manual is intended for two primary groups of users:

Customers: Individuals who register on the Private Sale Site to access exclusive sales, view and purchase discounted items from various brands, and manage their personal accounts and preferences.

Professionals: Brand representatives who use the Private Sale Site to create, manage, and analyze sales events. These users need to add new sales, update existing ones, and track performance metrics to optimize their offerings.

1.3 System Overview:

The Private Sale Site is an online platform designed to facilitate private sales of clothing items from major brands at discounted prices. The website serves as an intermediary between brand manufacturers and registered users, offering a secure and user-friendly environment for conducting sales that are exclusive to members.

Key features of the system include:-

User Registration and Authentication: Both customers and professionals can register and log in to access the site's features.

Sales Management: Professionals can create, edit, and manage sales, specifying details such as item descriptions, prices, and availability.

Sales Viewing: Customers can browse current and upcoming sales, view detailed item information, and make purchases.

Account Management: Users can manage their profiles, update their personal information, and set preferences for receiving alerts about new sales.

Analytics: Professionals have access to analytics tools that allow them to monitor the performance of their sales, including metrics such as the number of visitors, items sold, and revenue generated.

2. Getting Started

2.1 System Requirements

Before initiating the setup process, ensure that your system meets the following requirements:

- Compatible web browser (e.g., Chrome, Firefox)
- Internet connection for real-time data analysis

2.2 Installation Instructions

To set up the Smart Agriculture project, follow these steps:

- Download the project files from the official repository.
- Deploy the HTML, CSS, and PHP components on your web server.
- Configure the system settings, including database connections and sensor integration.
- Verify the installation by accessing the system through your web browser.

3. Main Dashboard Page

The Main Page of the Private Sale Site introduces the website to visitors, guiding them to either log in or register to access exclusive private sales. It serves as the gateway for users to engage with the site's offerings.

4. Login Page

4.1 Purpose:

The Login Page enables users with existing accounts to access the system.

4.2 Components:

Email/Username: User inputs their registered email.

Password: User inputs their password.

Login Button: Submits login credentials for authentication.

6. Customer Dashboard Page

6.1 Purpose:

The Customer Dashboard Page serves as the main interface for customers after logging into the Private Sale Site. It provides access to current and upcoming sales, account management options, and notifications for alerts about new offers and discounts.

6.2 Components:

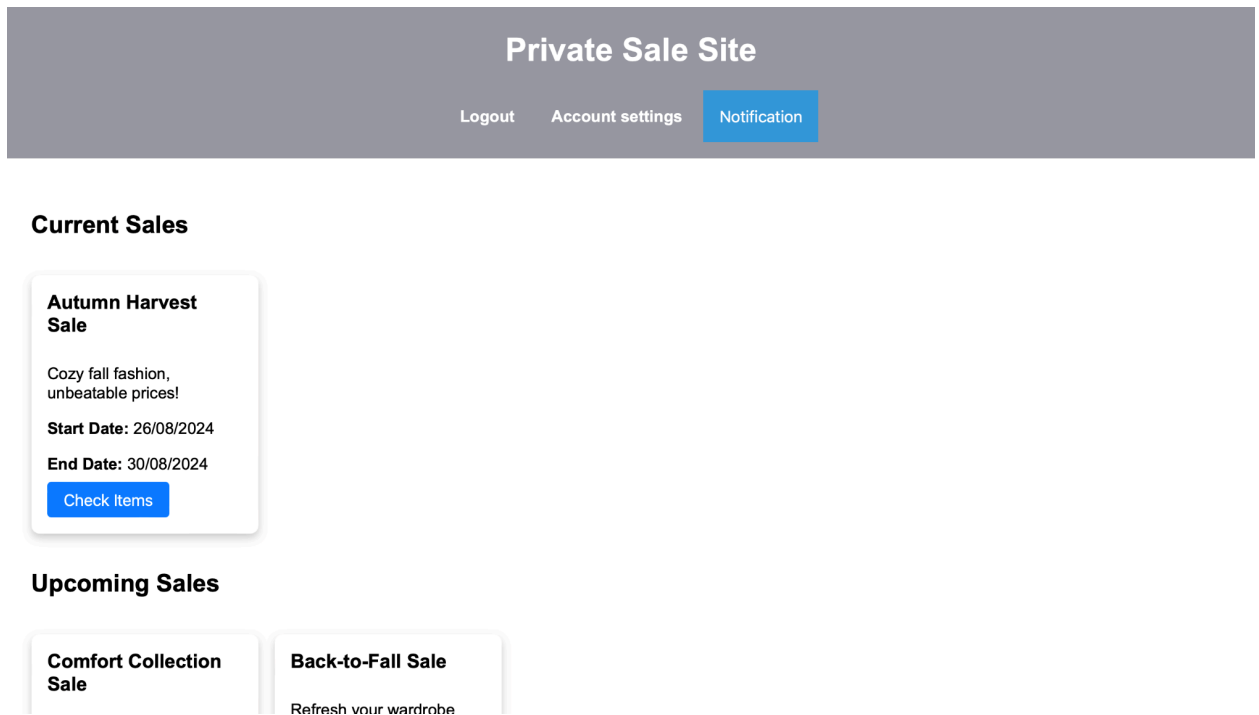

Current Sales Section: Displays ongoing sales events that the customer can participate in, including details such as sale name, description, start date, and end date. Customers can click on "Check Items" to view the items available in each sale.

Upcoming Sales Section: Lists upcoming sales with similar details to the current sales, allowing customers to preview future discounts and plan their purchases.

Account Settings: Provides an option for customers to update their account details, such as personal information and preferences.

Logout: Allows the customer to securely log out of their account, ending their session on the site.

Notifications: Displays alerts and notifications related to new sales or personalized offers based on the customer's preferences, ensuring they stay informed about opportunities to save.

7. Professional Dashboard Page

7.1 Purpose:

The Professional Dashboard Page provides brand representatives with centralized access to all the tools and features necessary to manage their sales on the Private Sale Site. It serves as the control center where professionals can navigate to various functions, including account management, sales creation, and analytical tracking.

7.2 Components:

Account Settings: Allows the professional user to update their personal information, password, and other account-related settings.

Dashboard: The central hub where professionals can access all sales-related functionalities.

Add New Sale: Provides a form for professionals to create and configure new sales, including setting start and end dates, uploading item details, and specifying discounts.

Add Items: A dedicated section for professionals to add new items to their sales, including details such as item name, description, price, size, color, and stock quantity.

View Existing Sales: Enables professionals to view, edit, or delete ongoing and past sales, ensuring they can manage their offerings effectively.

Logout: Safely logs the professional out of their account, ending their session.

Professional Analytical Page: This section allows professionals to track the performance of their sales by selecting a specific brand. It includes key metrics such as the number of items sold, total page visitors, total revenue generated, and the name of the brand. This analytical data helps professionals assess the success of their sales and make informed decisions.

8. Add New Sale Page

8.1 Purpose:

The Add New Sale Page allows professional users to create and configure new sales events on the Private Sale Site.

8.2 Components:

Sale Title: The professional enters the name of the sale, which will be displayed to customers on the site.

Description: A brief description of the sale, providing customers with key details about what the sale offers.

Start Date: The professional selects the date on which the sale will begin, ensuring it becomes visible to customers at the right time.

End Date: The professional sets the date on which the sale will conclude, after which it will no longer be accessible to customers.

Add Sale Button: Once all the details are filled out, the professional clicks this button to save the sale and make it live on the site according to the specified dates.

Back to Home: A link to return to the main dashboard or home page for further navigation.

9. View Existing Sales Page

9.1 Purpose:

The View Existing Sales Page provides professionals with an overview of all their current and upcoming sales. It allows them to manage their sales by offering options to view sale details, edit the sale information, or delete a sale.

9.2 Components:

Current Sales Section: Displays a list of ongoing sales, including the sale title, description, start date, and end date.

Check Items: Allows the professional to view the items included in the sale, but without the ability to edit them.

Edit: Provides the option to modify the details of the sale, such as the title, description, and dates.

Delete: Allows the professional to remove the sale from the system if it is no longer needed.

Upcoming Sales Section: Shows sales that are scheduled to start in the future, with similar functionalities as the current sales section.

10. Add New Items Page

10.1 Purpose:

The Add New Items Page allows professionals to create and add new items to their sales on the Private Sale Site. This page is essential for populating sales with detailed product information that will be visible to customers.

10.2 Components:

Sale Name: A dropdown or selection box where the professional selects the sale to which the new item will be added.

Brand: A field where the professional specifies the brand of the item being added.

Category: A dropdown to select the category that the item belongs to, such as "Men's Clothing" or "Accessories."

Sub-category: An additional dropdown for narrowing down the category, such as "Shirts" under "Men's Clothing."

Size: A field or dropdown where the professional enters or selects the available sizes for the item.

Color: A field or selection box where the professional specifies the color of the item.

Description: A text area for entering a detailed description of the item, including any features, materials, or other relevant information.

Photo: An option to upload a photo of the item, providing a visual representation that customers will see when browsing the sale.

Price: A field where the professional enters the price at which the item will be sold during the sale.

Stock Quantity: A field to input the quantity of the item available for sale, helping to manage inventory and prevent overselling.

11. Account Settings Page

10.1 Purpose:

The Account Settings Page allows both customers and professionals to view and edit their personal account details. This page provides users with the ability to keep their information up-to-date and secure on the Private Sale Site.

10.2 Components:

First Name: A field displaying the user's first name, which can be edited if necessary.

Last Name: A field displaying the user's last name, with the option to update it.

Date of Birth: A field where the user can view or update their date of birth.

Postal Address: A text area for the user's postal address, which can be modified to ensure accurate delivery or communication details.

E-mail Address: A field displaying the user's registered email address, with the option to change it if needed. This is also used for login and communication purposes.

Password: A section where the user can update their account password to maintain security. This typically involves entering the current password followed by the new password.

User Type: Displays whether the user is a "Customer" or "Professional." This field is usually non-editable but visible for user reference.

Save Changes Button: After making any necessary updates, the user can click this button to save all changes to their account information.
